

**AMENDMENTS TO THE SPECIFICATION:**

On page 6, beginning at line 23 and ending at line 26, please amend the specification as follows:

Detent **29** has a straight or hook-shaped inward face **[[76]]** to hold the card and prevent outward movement unless push bar **20** and rib **25** warp the card away from the detents. Sloping outer face **[[78]]** on the detent warps the card away from the detent upon inward movement of the card, allowing free inward movement upon pushing on the free end of the card.

On page 6, beginning at line 27 and ending on page 7 at line 2, please amend the specification as follows:

Initials of days of the week or other compliance related indicia located between the bubbles serve as reminders. After a pill is removed from a blister **30**, the card may be returned into the case by sliding it inwardly. During inward sliding, the sloped surface **[[78]]** urges the aperture **34** and the card **12** away from the detent **29**. When fully inserted, aperture **34** engage the detent.
